

LIGHT VEHICLE - OFFROAD (PRACTICAL)

AE-DRIV-03

↳ PERSONS CONCERNED:

For a maximum of 4 persons.

Management (Managers, Heads of Department, etc.)/Site HSE Managers (RSEs)/Intermediate management/Operations personnel/Design Department/HSE engineers/Production-maintenance-safety superintendents/Site management personnel/HSE-production-intervention supervisor/Foreman.

↳ PREREQUISITES:

AE-DRIV-01-03 (Theory), valid driving licence B verified on site.

↳ OBJECTIVES:

To be capable of anticipating potential road traffic accident situations. To respond to the urgency of the situations. To efficiently develop the aptitude to observe and the aptitude to control the vehicle. To demonstrate low-risk driving techniques.

COURSE CONTENTS

↳ Module 1 - Prior inspection

- Key points
- Equipment
- External inspection
- Tires...

↳ Module 2 - Tire pressures and inflation exercises

- Types of wheel rims
- Tires
- Deflating a tire...

↳ Module 3 - Breakdown vehicles and associated equipment

- Towing points
- Towing techniques
- Breakdown equipment.

↳ Module 4 - Commentary driving

Participants are assessed in the field during commentary driving training exercises to check and consolidate the modules covered previously in the theory sessions.

↳ Assessment

At the end of the two different types of sessions (theory and practical), the drivers will undergo a full assessment of their skills. The theoretical assessment will take the form of a multiple-choice test which must be passed before the participant can take the practical assessment. The practical assessment will consist of the continuous assessment that takes place during the course, and of a practical test of the qualifications.

Drivers must successfully complete both assessments to be considered proficient, and will then receive a certificate of proficiency.
